Antigravity Skills & Activation Guide

Quick reference manual for available environment capabilities & trigger workflows

13 Skills Active

⚡ 1. Automatic (Context)

Activated dynamically when your prompt matches the skill's capabilities and domain requirements.

🎯 2. Explicit Mention

Explicitly refer to the skill by name in your prompt (e.g., "*Using fullstack-web-master, build...*").

🚀 3. Slash Commands

Dedicated tools with explicit invocation rules must be run using their slash command (e.g., `/fixuiagent`).

FULL-STACK & WEB ENGINEERING

`fullstack-web-master`

Workspace Skill

Complete end-to-end web engineering covering clean architecture, 8pt design token systems, modern UI/UX polish, responsive patterns (<640px, 768px, 1024px+), accessibility (a11y), and resilient API contract integration.

HOW TO RUN: Auto on web tasks, or prompt: "*Using fullstack-web-master, design a responsive navigation component*"

GEMINI API & MULTIMODAL AI

`gemini-api-dev`

Plugin Skill

Full Google GenAI SDK integration: text generation, multi-turn chat, multimodal understanding, structured JSON schemas, speech generation (TTS), and function calling.

HOW TO RUN: Auto on Gemini prompts, or prompt: "*Using gemini-api-dev, create a structured JSON extraction script*"

`gemini-live-api-dev`

Plugin Skill

Real-time, bidirectional audio/video/text streaming over WebSockets with voice activity detection (VAD), session handling, and low-latency interaction.

HOW TO RUN: Prompt: "*Using gemini-live-api-dev, set up a real-time live audio streaming session*"

`gemini-omni-flash-api`

Plugin Skill

Generative video editing, text-to-video, image-referenced video generation, and first-to-last frame video transitions using Gemini Omni 1.1 Flash.

HOW TO RUN: Prompt: "*Using gemini-omni-flash-api, generate a video transition between two frames*"

UI & INTERFACE TOOLS

`generative_ui`

Built-in

Renders rich interactive HTML/CSS/JS widgets, custom controls, and visual data dashboards inline within the chat or as standalone artifacts.

HOW TO RUN: Prompt: "*Render an interactive dashboard widget using generative_ui*"

`ui-plugin-navigation` — Built-in

Discovers active UI plugin panels and surfaces one-click toggles to open them in the side pane.

HOW TO RUN: Prompt: *"Open the UI panel for my installed plugin"*

`fixuiagent` — Custom Agent

Automated UI testing, responsive layout auditing across viewports, visual alignment inspection, and CSS bug diagnosis.

HOW TO RUN: Slash command only: `/fixuiagent`

AUTOMATION & RELEASE QA

`buildaudito` — Custom Agent

Comprehensive QA validation, requirements verification, backend log diagnostics, and APK/binary release readiness sign-off.

HOW TO RUN: Slash command only: `/buildaudito`

`automation` — Built-in

Interactive assistant to design, schedule, and run background automations, recurring cron jobs, or delayed one-shot timers.

HOW TO RUN: Slash command `/automation` or prompt: *"Schedule a daily recurring task"*

ANTIGRAVITY SYSTEM & CUSTOMIZATION

`plugin` — Built-in

Authoring, packaging, installing, enabling, and managing reusable plugins (bundles of skills, agents, rules, and MCP servers).

HOW TO RUN: Slash command `/plugin` or prompt: *"How do I create a new plugin?"*

`agy-customizations` — Built-in

Comprehensive guide to customizing Antigravity: loading priorities, progressive disclosure, authoring skills, rules, hooks, and MCP servers.

HOW TO RUN: Prompt: *"How do I configure a custom Antigravity rule and MCP server?"*

`antigravity-guide` — Built-in

Complete manual and sitemap for Google Antigravity (CLI commands, keyboard shortcuts, IDE features, and configuration settings).

HOW TO RUN: Prompt: *"Show me Antigravity CLI commands and shortcuts"*

`migrate-workflows` — Built-in

Scans and automatically converts legacy workflow scripts into modern, standard Antigravity SKILL.md packages.

HOW TO RUN: Prompt: *"Migrate my old workflow files to modern skills"*
